HEALTH AND SAFETY MATTERS

Gary Martin

Health and Safety Executive

***'Delivering the Solution –
What this Means in Practice'***

Gary is a long standing, well respected HSE Inspector, based at the Wrexham office and is known for his wealth of understanding of health and safety law and practical approaches to workplace precautions.

With 25 yrs as an HSE Inspector Gary has experience of most industry groups enforced by the Executive. He has investigated numerous accidents and too many fatalities. He actively works with partners in Local Authorities, trade associations and with other key stakeholders, and his work with the satellite dish and aerial installation industry has produce a step change in the health and safety performance of the industry prior to digital switch-over in the UK. Gary has also worked in HSE's policy sections and whilst there he helped introduce Open Government into the HSE. He also worked for 5 years within the HQ legal section, dealing with all matters legal, including enforcement policy, civil disclosure, giving advice to inspectors on investigations and enforcement including prosecutions. Gary has also helped introduce the procedure for ensuring that inspectors engage and involve employees and their representatives during inspections and investigation *(to say he is keen on health and safety is an understatement and rumour has it that he has already risk assessed his own funeral).*
